

# FOODCYCLER

**St Clair Township continues to offer the Food Cycler Appliances (food waste processing units) at subsidized rates including the new larger Maestro Unit.**

Regarding product pricing, the FC 30 is priced at \$175.00, while the Maestro is priced at \$325.00.

It is important to highlight that the Maestro unit boasts more than double the bucket capacity.

Each product includes additional filters. The Maestro Food Cycler is equipped with a single, larger filter that utilizes the same carbon pellets as those utilized in the smaller FC-30 filters.

**WHAT IS A FOODCYCLER?**

-  Closed-loop indoor compost alternative, which speeds up the natural decomposition process.
-  It dries and grinds food waste into a dry, odourless, nutrient-dense by-product in 4-8 hours.
-  Use the byproducts as a fertilizer and add it to your garden, lawn or existing composting system.
-  Odourless, easy to use and energy efficient alternative

The purpose of the FoodCycler™ is to measure the viability of onsite food waste processing technology as a method of waste diversion. By reducing food waste at home, you can support your municipality in their environmental goals, reduce your household's carbon footprint and extend the life of your community's local landfill.

**\$175.00 + tax**

**\$325.00 + tax**

The FoodCycler Product Family offers closed-loop solutions to food waste, with zero emissions or odours. This sustainable process reduces your organic waste to a tenth of its original volume. Small and compact, FoodCycler products can fit anywhere! FoodCycler products operate quietly and efficiently, using little energy. All units come with Amazon 6A certification and a protective overbox as well as additional filters to use.
